Professional Summary

Results-driven Full-Stack Developer specializing in the MERN stack, cloud technologies, and scalable web applications. Experienced in building secure authentication systems, deploying cloud-based solutions, and developing high-performance applications. Passionate about clean architecture, system design, and delivering exceptional user experiences.

Education

- RNS Institute of Technology, Bengaluru — 2023- 2027
  B.E. Computer Science and Engineering — CGPA: 7.5
- RNS Pre-University College, Bengaluru — 2021-2023
  State Board, Class XII (PCMC) — Percentage: 88.67%
- BET Convent, Bengaluru — 2020- 2021
  State Board, Class X — Percentage: 78%

Personal Projects

- AdroIT Team Platform — 2025
  Collaborative team platform with modern UI, project showcases, and structured team information.

  Tools & technologies used: React, Vercel, Git, Team Collaboration
  Designed and developed a fully- edged social site deployed on Vercel, featuring professional landing presence and structured project showcases built as part of a team.

- Campus Event Management System — 2024
  Full-stack platform for managing college events, registrations, and attendance tracking.

  Tools & technologies used: MongoDB, Express.js, React, Node.js (MERN Stack)
  Built end-to-end event lifecycle management including creation, student registration, attendance tracking, and notification work flows to streamline campus administration.

- Authentication & Authorization System — 2024
  Production-ready auth system with JWT, RBAC, and real SMTP email verification.

  Tools & technologies used: Node.js, Express.js, MongoDB, JWT, Nodemailer, SMTP
  Implemented complete user registration and login flows with role-based access control and working email verification using real mail delivery via Nodemailer and SMTP.

- Gesture Detection Sign Language Recognition — 2024
  Real-time hand gesture recognition system for sign language accessibility.

  Tools & technologies used: Python, OpenCV, MediaPipe, TensorFlow
  Developed a computer vision pipeline that detects hand gestures in real-time and maps them to corresponding sign language symbols, improving accessibility for the hearing impaired.

Technical Skills and Interests

Languages: JavaScript, Java, C++, C
Frameworks & Libraries: React, Node.js, Express.js, OpenCV
Developer Tools: VS Code, GitHub, Postman, Thunder Client, Docker Desktop, Eraser.io
Cloud / Databases: AWS, Azure, GCP, MongoDB, Docker, Linux Server, Nginx
Concepts: REST APIs, JWT Auth, SMTP Integration, Microservices, System Design
Soft Skills: Team Collaboration, Problem Solving, Multilingual Communication (English, Kannada, Tamil, Hindi)
Areas of Interest: Web & Android Development, Cloud Computing, Machine Learning, Computer Vision

Positions of Responsibility

- Cloud Computing(Domain Lead), AdroIT Club – CSE Branch, RNS Institute of Technology — 2025-2026
